

PRESS RELEASE

High Point Networks Announces Acquisition of Vermillion Technologies

September 3, 2019 – West Fargo, ND – High Point Networks announced the completion of its acquisition of Managed Security Service Provider, Vermillion Technologies. The Vermillion Technologies purchase accomplishes the High Point Networks mission to expand its managed services offerings throughout the United States. Customers will benefit greatly from the expanded services and technical expertise the newly joined companies provide.

“We are excited to welcome both team members and customers to the High Point Networks experience,” President & CEO, Tom McDougall said. “This expands our technical expertise, market reach, and adds to our strong foundation of ‘as a Service’ offerings.”

As a premier provider of information technology solutions, High Point Networks is committed to making sure businesses are ‘Always Connected.’ They act as an extension of your team providing support in the areas of infrastructure, unified communications, data center and security. Their full suite of Managed Service options is tailored to unique needs of each business, while being backed by the best professional services team in the country. Our corporate headquarters is in West Fargo, ND, with regional offices in Bismarck, ND, Sioux Falls, SD, Brookings, SD, Billings, MT, Minneapolis, MN, Detroit Lakes, MN, Pueblo, CO, and Denver, CO. For more information, visit www.highpointnetworks.com.

“We value the longstanding success that Vermillion Technologies has built over the last 3 years and are committed to providing added solutions that will further enhance the organizations they have served,” concluded McDougall.

Over the next 30 days, both companies will be working through strategic transition items and will be communicating additional details to their team members, customers, and vendor partners.
